

## Creating a Positive Technology Zone – Lunch meetings 10.31.13

Present: (Lunch meetings) - Caitlin Russell, Michelle Cirulli, Alora Henry, Mina Ferris, Barry Derfel, Jasmin Martinez, Brittany Krise, Alexis Murray, Kelsey Harris, Alicia Abbey

### Actions Taken:

- We finished identifying easy and reasonable solutions for the remaining problems.
- We began thinking of ways to publicize two key items:
  - The list of possible problems and the easy and reasonable solutions that students will be expected to follow.
  - How to help the students understand that it will be their responsibility, individually and as a group, to implement these solutions with minimal adult reminders.
- Ideas for how to publicize:
  - Role-Plays and demonstrations during lunch periods.
  - Create a large *Positive Technology* banner for all students and staff to sign.
  - Students make one morning announcement each day until all of the items on the list have been explained.
  - Make posters.
  - Film the role plays and put the video on the website.
- Students in the 2<sup>nd</sup> meeting agreed to talk to Ms. Wilcox about getting help on a banner and to begin talking to their peers about doing role plays.
